Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Advoin-light-chain kinase (EC 2.7.1.117) A - slime mold (Dictyostelium discoideum)
Nilternate names: MCCKA A
C;Species: Dictyostellum discoideum
A;Title: Characterization and bacterial expression of the Dictyostellum myosin light
A;Title: Characterization and bacterial expression of the Dictyostellum myosin light
A;Reference number: A40811; MUID:91340753; PMID:1651931
A;Reference number: A40811; MUID:91340753; PMID:1651931
A;Reference number: A40811
A;Reference number: A51816-13824, 1990
A;Title: Observation and bacterial expression of the Dictyostellum myosin light chain kinase. Purification and characterization.
A;Reference number: A37125; MUID:90337997; PMID:2380188
A;Mitle: Dictyostellum myosin light chain kinase. Purification and characterization.
A;Reference number: A37125; MUID:90337997; PMID:2380188
A;Molecule type: protein
A;Reference number: A37125; MuiD:90337997; PMID:2380188
A;Pethway: cytokinesis; fruiting body formation
A;Reference number: A37125; PMID:90337997; PMID:9090protein; phosphotransfer-C;Superfamily: kinase-related transforming potein; protein kinase AfP-binding motif
E;265/Domain: protein kinase AfP-binding motif
E;37/Active site: Lys stratus predicted
E;37/Active site: Lys active surface and contrast vincound contrast vincound contrast predicted

Gene 113, 75-82, 1992
A; Title: Cloning and sequence determination of a CDNA encoding Aspergillus nidulans c
A; Reference number: JN0323; MUID:9225350; PMID:1563634
A; Molecule type: mRNA
A; Residues: 1-414 - KKOR>
A; Cross-references: GB:M74120; NID:92804304; PIDN:AAB97502.1; PID:9168033
C; Comment: This protein has been implicated in cellular signal transduction and cell c; Superfamily: unassigned Ser/Thr or Tyr-specific protein kinase hom: C; Keywords: AFP: calmodulin binding: Phosphotransferase
F; 21-278/Domain: protein kinase AFP-binding mobif
F; 29-37/Region: calmodulin binding #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 calmodulin kinase i homolog. Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Batten to US20020142427A1

GENERAL INFORMATION:

APPLICANT: MERKULOV, Gennady et al

APPLICANT: MERKULOV, Gennady et al

TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC

TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND ITILE OF INVENTION: THEREOF

TITLE OF INVENTION: THEREOF

CURRENT APPLICATION NUMBER: US/09/817,181

CURRENT FILING DATE: 2001-03-27
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          396

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 5958748
GENERAL INFORMATION:
APPLICANT: AIRA, SHIZUO
TITLE OF INVENTION:
FILE OF INVENTION: DNA CODING FOR SERINE/THREONINE KINASE
FILE REFERENCE: PH-569
CURRENT APPLICATION NUMBER: US/09/159,385
CURRENT FILING DATE: 1998-09-23
EARLIER APPLICATION NUMBER: J997-09-26
NUMBER OF SEQ ID NOS: 8
